

GlyphoZinc™

**Formulated using
HyGrow-Wik
Technology™**

GlyphoZinc™ is a soluble, complexed zinc that can easily be mixed with any Glyphosate such as Roundup. GlyphoZinc™ provides the ability to treat Roundup tolerant crops with needed zinc without having the expense of an extra application. Due to its low pH, GlyphoZinc™ enables the grower to forgo the use of a surfactant. GlyphoZinc™ may be applied by air or with all types of ground spraying equipment. However, USER ASSUMES FULL RESPONSIBILITY to ensure compatibility when tank mixing with other products.

Grade: 3-0-0

Source Derived From:
Zinc citrate

Guaranteed Analysis:

| | |
|--------------|--------|
| Nitrogen (N) | 3% |
| Zinc (Zn) | 12.75% |

Suggested Foliar Applications:

Roundup Ready Row Crops : Apply 1 quart/acre when making Glyphosate applications. Repeat as needed.

Content: 275 US Gallons

Made in the USA

SHAKE WELL BEFORE USE

Net Weight: 3300 lbs
